Cabin by the lake

Inspired by a A shape cabin made by <https://www.madihome.com/> with my own twist on the cabin. I am currently working on animating the water : [click here for the video](#)

Statue in the woods

I found this awesome website with very high-quality 3d scans of statues.
<http://threedscans.com>

The challenge was to work with grass and make it as realistic as possible.

Apartment tour

I am working on a full tour apartment. I've been using "pannellum" to navigate through my website: <http://ffael.com>

Copy of an Ikea "photo"

Ikea kitchen from an Ikea catalogue.

Original:

Armchair copper pipe

Chair designed by me, always wanted to make a copper pipe chair as a DIY project, but I decided to first make it in 3d. Maybe one day, I will build it for real.

Wooden blocks decoration wall

Last week I saw an interesting wall in a café back in Melbourne, I was pretty interested to try to do it. Here's the result.

Industrial scene

The purpose of this scene was to study volumetric lighting.
